Pitch & Resource Allocator/Scheduler Version 1.0

For larger sports clubs, scheduling can be one of the most demanding jobs of the week.

SportLoMo's new Pitch & Resource Allocator/Scheduler is designed to make complex club scheduling easier. From one central place, administrators can manage fixtures, training sessions, subdivided pitches, fields, courts, tracks and other shared resources.

Because the module connects directly with SportLoMo's Competition Management System, club admins can work from the latest list of official fixtures and schedules already in the platform.

THE CHALLENGE

Busy clubs, limited space and too much manual work

Scheduling is a challenge we see across larger clubs in many of the sports and regions we support. In Ireland, the Pitch Allocator/Scheduler is particularly useful for larger IRFU rugby clubs and Dublin & District Schoolboys/Girls League soccer clubs, where busy weekly schedules can place real pressure on administrators and volunteers.

A larger club may have 30 home matches to allocate in a single week across 60-plus teams, alongside training sessions, pitch availability, mini-game layouts and other bookable club spaces.

- **Double bookings**

Clashes can happen when schedules are managed manually.

- **Limited visibility**

Coaches and teams may not see the latest allocations.

- **Time-consuming admin**

Spreadsheets, messages and manual updates can quickly add hours each week.

REAL CLUB NEED

8 hours
spent every week on allocation

One competition coordinator at a large Dublin club told us he spends around **eight hours** every week allocating games, training sessions and matches. He is looking forward to getting started with the new Allocator/Scheduler and expects it could be a real game-changer for planning the week ahead.

One connected place to manage club resources

The Pitch & Resource Allocator/Scheduler is designed to make complex club scheduling easier. From one central place, administrators can allocate fixtures, manage training slots, subdivide pitches for minis and junior games, schedule courts and share resources such as dressing rooms.

More than pitches

The Allocator/Scheduler is not limited to pitches. It can be used to manage a wide range of club resources, including fields, tracks, courts, tables, halls, dressing rooms, meeting rooms and other shared spaces.

Connected to fixtures

A key benefit is that it connects directly with the SportLoMo Competition Management System, giving administrators access to the latest official fixtures and schedules already in SportLoMo.

Built for the way clubs actually operate

Multiple venues

Full-size pitches, half pitches, training areas, indoor halls and event spaces.

Flexible spaces

Split facilities into halves, thirds or quarters for minis, juniors and training.

Visual scheduling

Day and week views help clubs see what is happening across resources.

Drag and drop

Use the SportLoMo hopper system to move fixtures and teams onto available pitches.

KEY CAPABILITIES

Less duplication, clearer schedules and better use of every space

Fixture integration

Club administrators can work from the latest list of official fixtures and schedules already in SportLoMo, making it easier to allocate resources, teams and matches in real time.

The hopper system

Using SportLoMo's popular hopper system, administrators can move fixtures and teams onto available pitches in a visual, practical way.

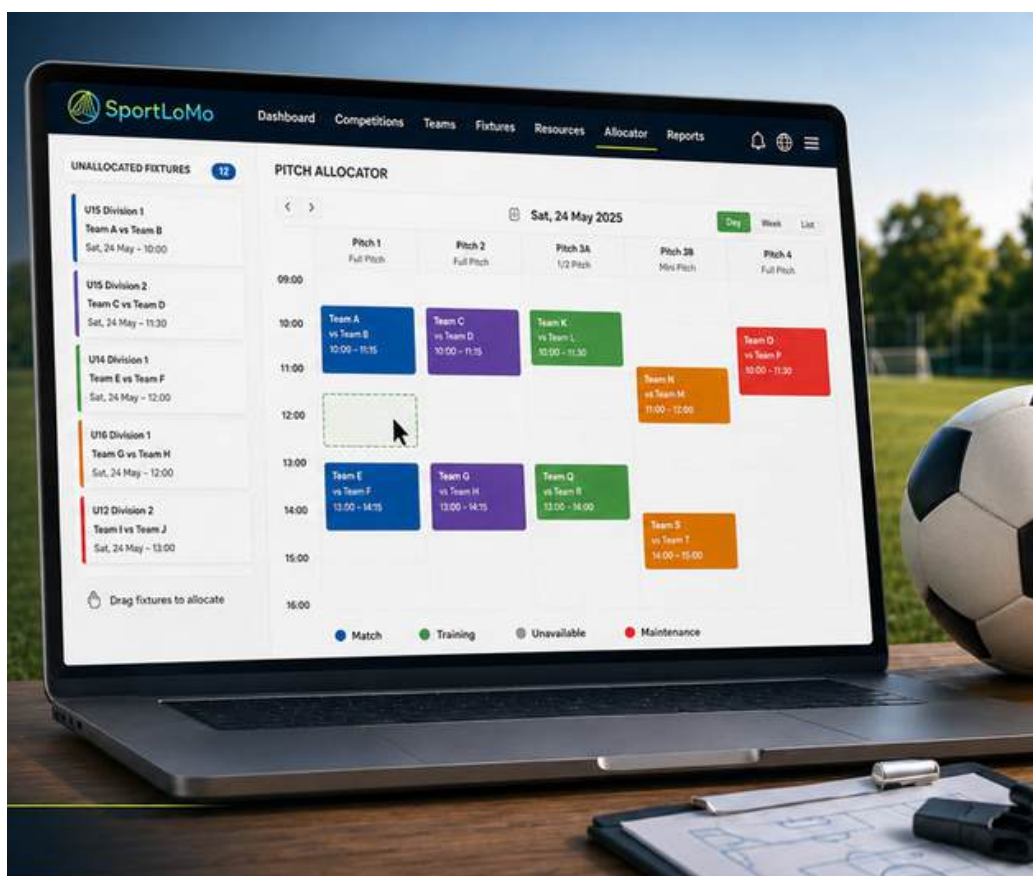

Pitch splitting

Manage spaces within a venue by splitting pitches into halves, thirds or quarters depending on the age group, activity or match format.

PDF schedule output

Once allocations are complete, the Allocator/Scheduler can generate PDF outputs of pitch bookings and schedules for coaches, managers and organisers.

WHY IT MATTERS

The right people know where they need to be

For busy clubs, creating the schedule is only part of the job. Coaches, team managers, volunteers and organisers need to know where they are going, when they are playing or training, and which space has been allocated to them. Clear PDF schedule outputs help make that communication easier.

NOW AVAILABLE

Pitch & Resource Allocator/Scheduler Version 1.0 is now available

Version 1.0 is focused on the club administration side of the process, giving administrators the tools to manage resources, allocate fixtures, organise training slots and improve visibility across facilities.

Version 1.0

Now available to clubs already using SportLoMo. There is no additional charge for using this module if your club is already on the platform.

Version 2.0

In development, with plans to support coaches, members and the wider public in selecting available pitches, fields, astroturfs, tables, halls or court time slots, with the ability to book and pay online.

Future Development Areas

Booking requests

Allow clubs to manage requests while keeping administration controls in place.

Approval workflows

Support a clear process before resources are confirmed.

Availability visibility

Make available slots easier to see for approved audiences.

Online payments

Support future online booking and payment workflows.

BUILT AROUND REAL CLUB NEEDS

Designed to make club scheduling clearer, faster and more connected

The Allocator/Scheduler module is another step in the ongoing work to make SportLoMo better for the clubs, leagues and governing bodies who use it every day.

It reflects practical development shaped by customer feedback and the real operational challenges clubs face.

A big thank you to our team for listening to what clubs need, continuing to move quickly and building practical features for the sports organisations we support.

Get started

Clubs interested in using the Pitch & Resource Allocator/Scheduler should contact their SportLoMo account manager.
